MIXED AIR AMOUNT ALARM DEVICE )

Group Art Unit: 2632

Examiner: DANIEL J WU

Confirmation No.: 8564

## SECOND INFORMATION DISCLOSURE STATEMENT

Commissioner for Patents P.O. Box 1450 Alexandria, VA 22313-1450

Sir:

In accordance with the duty of disclosure as set forth in 37 C.F.R. § 1.56, the accompanying information is being submitted in accordance with 37 C.F.R. §§ 1.97 and 1.98.

German Offenlegungsschrift No. 101 47 181. This document discloses a brake-by-wire electrohydraulic braking system in which hydraulic pressure is supplied to at least one wheel cylinder through an accumulator and a piston. An English language abstract of this document is attached.

For the Examiner's reference, U.S. Application Publication No. 2003-0090149 submitted with the First Information Disclosure Statement disclose a hydraulic pressure generator that outputs hydraulic pressure proportional to the brake operating amount. In response to the output pressure of the hydraulic pressure generator, the brake operates. Based on a delay in the start of brake operation, the presence of air mixing is detected.

To assist the Examiner in entering the foregoing information into the record, the above-noted document is cited on the attached for PTO-1449 and a copy of the document is enclosed.

SECOND Information Disclosure Statement Application No. <u>10/701,460</u> Attorney's Docket No. <u>033498-014</u>

Page 2

The Examiner is respectfully requested to consider the foregoing information and to acknowledge such consideration by initialing, signing and returning the enclosed additional copy of form PTO-1449.

Respectfully submitted,

BURNS, DOANE, SWECKER & MATHIS, L.L.P.
